

Michele's Preventative Maintenance Guide

Daily

- Keep your sewing machine covered
- Avoid extreme Hot/Cold weather
- Keep liquids at a safe distance

Weekly

- Clean machine bobbin area
- Clean machines needle and ankle area
- Clean top of machines

Monthly

- Run machine for 20 – 40 inches
- Stitch a straight stitch & zig-zag
- Listen to machine's sounds

Yearly

- Get professionally cleaned.

I feel taking a little bit of time to provide preventative maintenance on a regular basis will lay a foundation for smooth sewing for years to come. Nothing is worse than having your sewing machine not working properly when you need it. I have been there & hope with these simple guidelines we can avoid any unnecessary downtime. Happy Sewing!!
